

Facing Insulation Challenges

- For temperature up to 150° C, our heating jacket provides high performance at low cost
- Features lightweighted and field-customizable insulation material with melamine sponge as insulations layer
- With a 15mm sponge thickness, it keeps the surface temperature below 50° C
- Compared to silicone rubber, our heating jacket offers 30 to 40% energy saving at less than half the price
- It can be easily installed on-site with scissors and is suitable for cleanroom operations with low dust generation
