

Jacket Form for Booster Pump

The application of insulation material as a thermal barrier for booster pumps, which are utilized upstream of vacuum pumps, proves to be highly effective and beneficial:

- Exceptional thermal insulation performance
- Internal temperature up to 150° C, external temperature below 60° C
- Heat resistant up to 150° C
- Made of melamine sponge
- Suitable for cleanroom environments
- Easy installation and removal
- Cost-effective
