

## Importance of Jacket Form -60~150°C Food Industry: contribution to HACCP

One of the main products offered by Luck Design is our innovative **Jacket Form** made of **melamine sponge**. In this presentation we are excited to highlight the numerous benefits that our Jacket Form brings to the food production industry.

### Key features and benefits:

**Temperature control:** our jacket form can help maintain consistent and controlled temperatures for equipment and containers, which is crucial for food safety in various processes such as cooking, cooling, and storage. A proper temperature control is essential to prevent the growth of harmful bacteria and to ensure that food producing processes or storage is at a safe temperature.

**Cross-Contamination Prevention:** what insulation jacket also can do id to isolate equipment or pipelines that transport different types of food or ingredients, reducing the risk of cross-contamination between various food products.

**Hygiene and cleanability:** High quality insulation made of melamine sponge and glass cloth can be easy to clean and maintain, educing the risk of food contamination due to residue buildup. In addition it keeps the production environment clean as well.

**Energy efficiency:** As result of a good temperature control, our Jacket Form is able to drag down the energy efficiently and drag down the cost down to 30% to 40%. In addition the melamine sponge used is also cost efficient which will further save you on your cost.

**Custom made:** At Luck Design, we value our client as our primary goal. We offer Jacket Form in different shapes and all details will be carefully discussed with our clients. To unsure our high-quality, we also enhance a short delivery time. Making you sure our clients gets the best product as soon as possible.

Here are some of the Jacket Form we make. All our Jacket Form are custom made, you can have it in any shape you want.
