

## Cutting-Edge Insulation Material Processing Service: Precision and Versatility

We offer precision cutting services for a wide range of insulation materials. Our capabilities include working with unconventional materials such as **glass fiber (wool), melamine sponge, special elastomers, and other non-standard materials** that are not typically found in the general apparel industry. We employ **advanced technology**, including **automatic cutting machines and laser cutting systems**, to process these materials.

In addition to our cutting services, we provide sewing solutions to meet your specific requirements. We are **well-equipped to handle complex shapes, intricate precision cutting, large-scale production, and small-batch, diversified product needs**. With the provision of **CAD data**, we can ensure short lead times for your projects.
