

# Heat-Shielding Curtain: Protection form heat sources, ensuring comfort

Our company's heat-shielding curtains boast exceptional light-blocking and radiation-blocking properties. They proficiently intercept radiative heat, encompassing visible light, infrared radiation, and far-infrared radiation, among others.

This strategic heat mitigation approach results in the establishment of highly comfortable indoor environments. These curtains are particularly advantageous in industrial settings such as factory floors, offering effective protection from heat sources and affording occupants a refined level of comfort.

## Standard Product:

Width = 1m, Length= 3m, with eyelets (150mm pitch) at the top,  
And J-bar hooks on the sides (spaced 500mm apart to connect  
with adjacent units)
